Charging Cradles

for KDC®1100 SmartSled®

Versatile

KDC1100 Charging Cradles offer versatile charging options, featuring 15W fast charging and supporting USB-C or DC connector based on the configuration. SmartSled cradles come in 1-slot and 5-slot versions. Pistol Grip/1W UHF cradles are also available in 1-slot (no battery), 1-slot and 5-slot options. And, all Cradles provide simultaneous charging for both host devices and KDC batteries, where applicable.

Secure & Convenient

The SmartSled securely fits into the cradle, enabling devices to charge via pogo pins, reducing wear-and-tear on device ports, and allowing for effortless charging by simply placing the device into the cradle.

Upgradable & Future-proof

Utilizing a versatile spacer system, your investment remains protected when transitioning to a new host device. Should you upgrade or transition to new smart devices, simply replace the spacers rather than the entire charging solution. This reflects our dedication to minimizing electronic and plastic waste.
